

PREPARATION FOR The First Test of English

The Eiffel Tower is one of the landmarks most people can easily link to France. This metal tower stands in the city centre of Paris. It was built for the 1889 World Fair to celebrate the 100th anniversary of the French Revolution. It was meant to be there only for the exhibition, but it still is the main attraction in France's capital.

The 324 metres high Eiffel Tower was designed by Auguste Eiffel. It has three levels for visitors, with restaurants on the first and the second floors. If you would like to take the steps up to the tower-viewing platform on the second level, there are 674 steps to climb, but luckily there are also lifts in each of the leg up to the second floor.

The Eiffel Tower is the most visited monument with an entrance fee in the world. It has been visited by over 250 million people since its opening. 6.91 million people ascended it in 2015 and in 2016 more than 7 million visitors were welcomed on the tower's top platform!

A. Reading Comprehension:

Activity One: read the text and complete the fact file below (4 pts)

<i>Fact File</i>	
Landmark : Eiffel Tower	Construction date:
Designer :	Location :
Height :	Number of floors: Three (3)

Activity Two: read the text and answer these questions (3 pts)

1. Why was the Eiffel Tower constructed?
2. Does it have elevators to the second level?
3. How many people visited the tower in 2016?

Activity Three: find in the text the synonyms of these words (2 pts)

1. constructed =
2. elevators =
