

# The 2<sup>nd</sup> English Exam

**Text:**

**Dentist:** What is wrong with you, kid?

**Amir:** I have an awful toothache.

**Dentist:** How long have you had this pain?

**Amir:** For about a week. And it is really getting bad.

**Dentist:** Do you usually eat a lot of sweets?

**Amir:** Yes. I always buy some sweets and chocolate to eat them after school.

**Dentist:** It will hurt more when you eat something sweet. So, you should stop eating them. You should not also eat or drink something cold. I will prescribe some pills to stop the pain.

**Amir:** That is great.

**Dentist:** You should also brush your teeth three times a day.

Amir has another health problem. He suffers from obesity. He is overweight because he eats too much fast food. So, I write a short paragraph in which I advise him to lose weight using should, shouldn't.

Hello, Amir. As I see you need my advice for your problem of obesity; I am going to give some pieces of advice, I hope you go by them at once. They are about one day of your life, and after many days will see that you started to lose some of your overweight. You should avoid eating too much sugary and greasy foods; you should increase the foods that are made of vegetables; you should practise sport two time a week at least; you should drink less lemonades and much water; you shouldn't eat much chocolate and candies; you should see your doctor 1 time a month.
