Text:

Everyone dreams of a career that matches his personality and interests. For me, becoming an Artificial Intelligence (AI) engineer is my true calling. This profession is creative, wholly innovative, and deeply impactful. It also requires individuals to be curious, determined, analytical, and forward-thinking. Here is why I believe this career suits me and why it stands out as my dream job.

First of all, AI engineers solve real-world problems, which require curiosity and determination. Whether it's creating smart healthcare systems to diagnose diseases early or designing safe self-driving cars, AI engineers tackle challenges that can change lives. My natural curiosity to explore and solve complex problems aligns perfectly with the responsibilities of this role, in which I must be both honest and knowledgeable about the work I do.

Secondly, being an AI engineer involves working with cutting-edge technology, which suits an analytical and forward-thinking personality. This field is all about building intelligent systems and developing machine learning models. It requires analyzing large amounts of data to make machines smarter. For someone who loves technology and thinking ahead to what's possible in the future, this job is both exciting and intellectually rewarding.

Lastly, the demand for AI engineers is growing rapidly, making it a secure and fulfilling career choice. This role allows me to innovate and contribute to society while also offering excellent opportunities for personal and professional growth. I believe my analytical and determined nature would help me succeed in this ever-evolving and competitive field.

In conclusion, becoming an AI engineer is more than just a career; it's a chance to make a difference in the world while staying true to my personality and passions. The combination of creativity, purpose, and growth opportunities makes it the perfect dream job for me.

Part One: (14pts)

Adapted By the teacher

Task one: Reading Comprehension (7pts)

A/ Choose the most appropriate title : (1pt)

- a) AI Engineering: A career of innovation and impact.
- b) The rise of artificial intelligence jobs.
- c) Why AI will replace traditional careers.

B/ Say if these sentences are "True" "False" or "Not mentioned": (1.5pt)

- a) The text explains that AI engineers work with outdated technology.
- b) Curiosity, determination, analytical thinking, and forward-thinking are described as essential qualities for an AI engineer.
- c) AI engineering is a field that is growing rapidly, offering high demand for professionals.

C/ Match each idea with its corresponding paragraph: (2.5pts)

- | | |
|---|---------------|
| • How AI engineers use technology to improve everyday life. | • paragraph 1 |
| • The qualities needed to be a successful AI engineer. | • paragraph 2 |
| • The role of AI engineers in creating intelligent systems and analyzing data. | • paragraph 3 |
| • The author's personal reflection on why engineering is the ideal career choice. | • paragraph 4 |
| • The growing demand and career opportunities in AI engineering. | • paragraph 5 |

D/ Lexis: Choose the correct synonym: (2pts)

- a) **innovative** → (simple – outdated – creative)
b) **smart** → (intelligent – hardworking – logical)
c) **rewarding** → (satisfying – challenging – disappointing)
d) **succeed** → (improve – advance – achieve)

Task two: Mastery of language (7 pts)

A/ Give the correct form of verbs between brackets (.): (3pts)

Becoming an AI engineer is a challenging but rewarding career. While I **(to study)** at the university, I learned many new things about artificial intelligence. I **(not / to give up)** because I believe that AI engineers **(to help)** solve important problems in the future.

B/ Complete with: like – unlike – whereas (2pts)

- a) many other simple professions, AI engineering requires continuous learning to stay updated with new technologies.
b) non creative jobs, AI engineering encourages innovation and problem-solving.
c) Some careers focus on routine tasks, AI engineering involves constant problem-solving and advancement.
d) medicine and education, AI engineering has the power to transform people's lives for the better

C/ Circle the silent letters in these words: (2pts)

wholly – honest – knowledgeable – would

Part Two: (6 pts)

➤ **situation of integration:**

Your e-mail friend wants to know about your dream job. Write him / her a letter in which you:

- a) describe your personality. (ambitious – hard working – creative...)
b) talk about your interests. Did they affect your choice?
c) Dream job: Reasons for your choice.

مدرسة الرجاء والتفوق الخاصة

Ecole Erradja wa Tafaouk

École Privée

B/ Complete with: like – unlike – whereas (2pts) 0.5 PT for each

- a) **Unlike** many other simple professions, AI engineering requires continuous learning to stay updated with new technologies.
- b) **Unlike** non creative jobs, AI engineering encourages innovation and problem-solving.
- c) Some careers focus on routine tasks, **whereas** AI engineering involves constant problem-solving and advancement.
- d) **Like** medicine and education, AI engineering has the power to transform people's lives for the better

C/ Circle the silent letters in these words: (2pts)

wholly – honest – knowledgeable – would

Part Two: (6 pts)

➤ **situation of integration:**

Pupils should write an e-mail (letter) to their friends in which they talk about their dream job, following the cues given : a) , b) and c)
